

AI-POWERED ACTIVE LEARNING:

10 STRATEGIES FOR ENGAGING WRITERS ONLINE

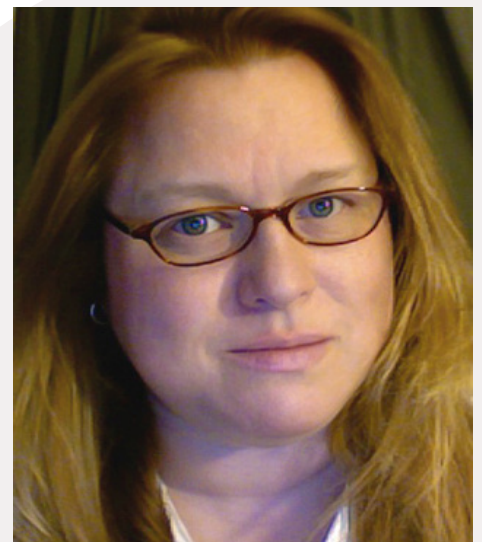

WEBINAR OVERVIEW

In this webinar, Traci will demonstrate how generative AI can be used as an active learning partner for strategies such as role play, think-pair-share, simulations, debates, and concept mapping. Attendees will also learn how students can use image generation AI tools to participate in active learning strategies such as human tableau, show and tell, and reflective pictures.

Ready-made prompts will be provided for easy customization and classroom use. Although the session won't cover AI policies due to time constraints, links to resources for creating policies will be available.

LEARN HOW TO

- **Implement AI-Powered Active Learning Strategies:** Learn practical techniques for integrating AI into pedagogical practices to foster active literacy learning in online environments.
- **Use AI Tools Effectively:** Acquire hands-on experience with AI tools designed to support writing instruction and student engagement.
- **Create Actionable Plans for AI Integration:** Develop concrete plans to implement AI-powered active learning strategies in their courses, tailored to specific instructional contexts.
